NP/TCA/1224/1326	The tree is a Sycamore located within 6 meters of the cottage and neighbouring buildings, with the canopy overhanging the property. The roots are embedded in a brook side retaining stone wall and are undermining the wall. The tree has recently shown worrying signs of damage a large crack has appeared in the bark for the full height of the trunk. The heart of the canopy has a lot of dead branches which are continually falling. We believe that this tree is a danger to the properties and needs to be	Accept

NP/TCA/1224/1410	Two trees adjacent to boundary wall, one Pine and one Laurel. The Laurel which is multistemmed, has failed in high winds and has droped a bough onto the boundary wall, causing the wall to collapse. The proximity of these trees to the wall is extremely close, as such, to prevent further issues, it has been recommended by our tree consultant that we fell the remainder of the Laurel,	Accept
